**QUICKNESS, RELIABILITY AND STURDINESS**

Astra, according to its experience of utmost knowledge, has manufactured the BM. 201, a 4x4 vehicle designed according to all engineering solutions which granted ASTRA to get a leading role in the production of Heavy-Duty vehicles suitable for quarries and job-sites.

BM. 201, due to its features, is particularly appreciated by Governmental and Civilian Organisations for its Multi-Purpose way of equipment/assembling and vehicle reliability.

Specific versions as i.e: Blade snow plow device, ecological transports, crane version, fuel, water tanks and autopumps are easily solved thanks to this vehicle which has achieved an advanced technology and design for civilian protection.

This 4-Wheel-Drive vehicle has been studied using the latest «Manufacturing Philosophy» of ASTRA, which bases its production on high RELIABILITY, STURDINESS AND VERSATILITY.

**ASTRA Veicoli Industriali**

The **RELIABILITY** derives from the experience obtained in these years in the transport for quarries and job-sites field.

The **4-Wheel-Drive** permits to **BM. 201** to become a quite sure vehicle in all road conditions.

The **STURDINESS** is assured by the over-sized chassis-frame, manufactured red grant the highest stress resistance.

The **VERSATILITY** is according to the type of equipments for the different requests which **BM. 201** could easily solve.

**ASTRA**, as usual, thanks to its high experience and technology, manufactured the **BM. 201** vehicle to satisfy the most different requests of the customers (which require very high specialized units), being again at the top level in this field.
