EA is big business

Along with extra space comes greater versatility. To begin with, all sorts of options are open to you. Take a choice of three different capacities - 274, 322 or 360 cubic feet. Payload choice, from around 3,200 to over 5,100 lb. Choice of engine - petrol or diesel - both engineered to high standards and proved by hundreds of thousands of road miles. Then there's the uncompromising squared-up interior, ready to accept any form of racking, partitioning or bench seating. Even the wheel arches (such as they are) are squared up. So you can stack on and around them. One way or another, the obliging EA van adapts itself to every kind of business. Including yours.

EA Specially designed for special business

EA Chassis/cab

Need special bodywork? With its massive steel frame and versatile adaptability, the EA lends itself to all kinds of special bodies. The chassis/cab version is fitted with hinged doors.

EA Chassis/part cab

The chassis/part cab, without doors and fittings, has even more scope for bodybuilders. So whatever your business, you can tailor the van to the job, not the job to the van.
