Mercedes-Benz Unimog

BLACK EDITION

In a class of its own.
For driving.
For special occasions.

The Unimog Black Edition is a new and exclusive truck from Mercedes-Benz. The ideal vehicle for recreation and sport. Exciting and totally different – day after day no matter which application you use it for.

Like a glossy black panther on the prowl, the Unimog Black Edition is a dream come true for individualists. It's definitely not the right vehicle if you're concerned about blending in.

A vehicle in a class of its own. Offering you power, stamina and outstanding performance. Combined with effortless manoeuvrability and high payload capacity. In the city and when off-roading in extreme terrains. For excursions into rough mountain terrain, hot deserts or remote ski slopes – or for exclusive shopping sprees. It's also flexible for hauling boats and yachts or transporting horses. The Unimog Black Edition is always the star of the show.

Based on the Unimog U 500, the Black Edition has a distinctive silhouette, an interior exclusively trimmed in leather and carbon fibre, an elegantly panelled platform and a redesigned front bumper. Customised by top tuning firm Brabus the Black Edition is tasteful and elegant both inside and out.

Equipped for first-class travel down to the smallest detail. The eye catcher for special occasions. The Unimog Black Edition's panoramic visibility and compact dimensions give you a safe and secure driving environment even in the most extreme off-roading situations.

Unimog Black Edition.
Exclusive enjoyment.
The epitome of sportiness.

In a class of its own.
Experience the thrill of adventure.
For independent-minded drivers.

Technology, like life, is more interesting at the cutting edge. Sporty and elegant, this Mercedes-Benz Unimog offers effortless manoeuvrability through traffic. Its Mercedes-Benz diesel engine develops maximum torque of 1120 Nm from a displacement of 6.4 litres. Top speed, depending on country and tyres, is 110 km/h.

The Unimog Black Edition combines all the advantages of a luxury sedan with the powerful brawn of a working truck. Its adaptability and flexibility are always impressive. For example the tirecontrol system – integrated in the portal axle – can be directly controlled from the driver's seat to adjust the tyre pressure for every terrain, while the AutomaticShift transmission offers a choice between automatic or manual mode driving with up to 16 forward and 14 reverse speeds. A sporty vehicle offering every comfort.

For sporty and extravagant drivers. An extraordinary experience on four wheels: featuring the Comand-System from the S-Class, with integrated 6.5-inch screen, and a DVD navigation system with CD changer and integrated compass function for longer off-road expeditions. The experience is rounded off by premium contoured leather seats and a sound system with subwoofer for unadulterated listening pleasure.

The ceiling as well as the A- and B-pillars are lined with alcantara leather. The instrument panel, centre console and other cab details are made of carbon fibre and the footwells are carpeted in luxurious velour.

To sum up, with all its refinements, this extravagant vehicle is a haven of relaxation in a first-class environment.
